SUMMARY

I am a web developer with a focus on front end development as well as WordPress theme and plugin development. I'm passionate about creating great user experiences, bringing ideas to life and working with a dedicated team to build awesome things.

EXPERIENCE

GymFitness Website (dev-gymfitness.pantheonsite.io**)**
PHP, CSS/SASS, JavaScript, jQuery, Gulp, WordPress
• A fully dynamic WordPress website providing information about the gym's classes, blogs, etc.
• Other tools: Lightbox.js for images, Slicknav.js for responsive navigation & media query snippets.
• Incorporates advanced custom fields, custom post type & sidebar widget to increase functionality.

Toyota 4Runner Landing Page (4runner.netlify.app**)**
HTML, CSS, Bootstrap, JavaScript
• A simple landing page to promote the Toyota 4Runner including its capabilities and features.
• Utilizes a variety of animations to produce a smooth user experience.
– this includes keyframes, scroll animation, and slide animation.
• Includes the usage of pseudoelements as well as photo edited images.

Fangtastic Brows Microblading Website (fangtasticbrows.netlify.app**)**
HTML, CSS/SASS, JavaScript, Google Maps
• A static website to showcase information & the services of a local small business.
• Designed to be simple yet elegant and informational, and could potentially transition to a fully dynamic WordPress website to acquire blogging capabilities and improve overall SEO.
• Includes an image gallery built with pure vanilla JavaScript, parallax scrolling & google maps.
